WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

REPORT NO. 176
PAGE 1

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

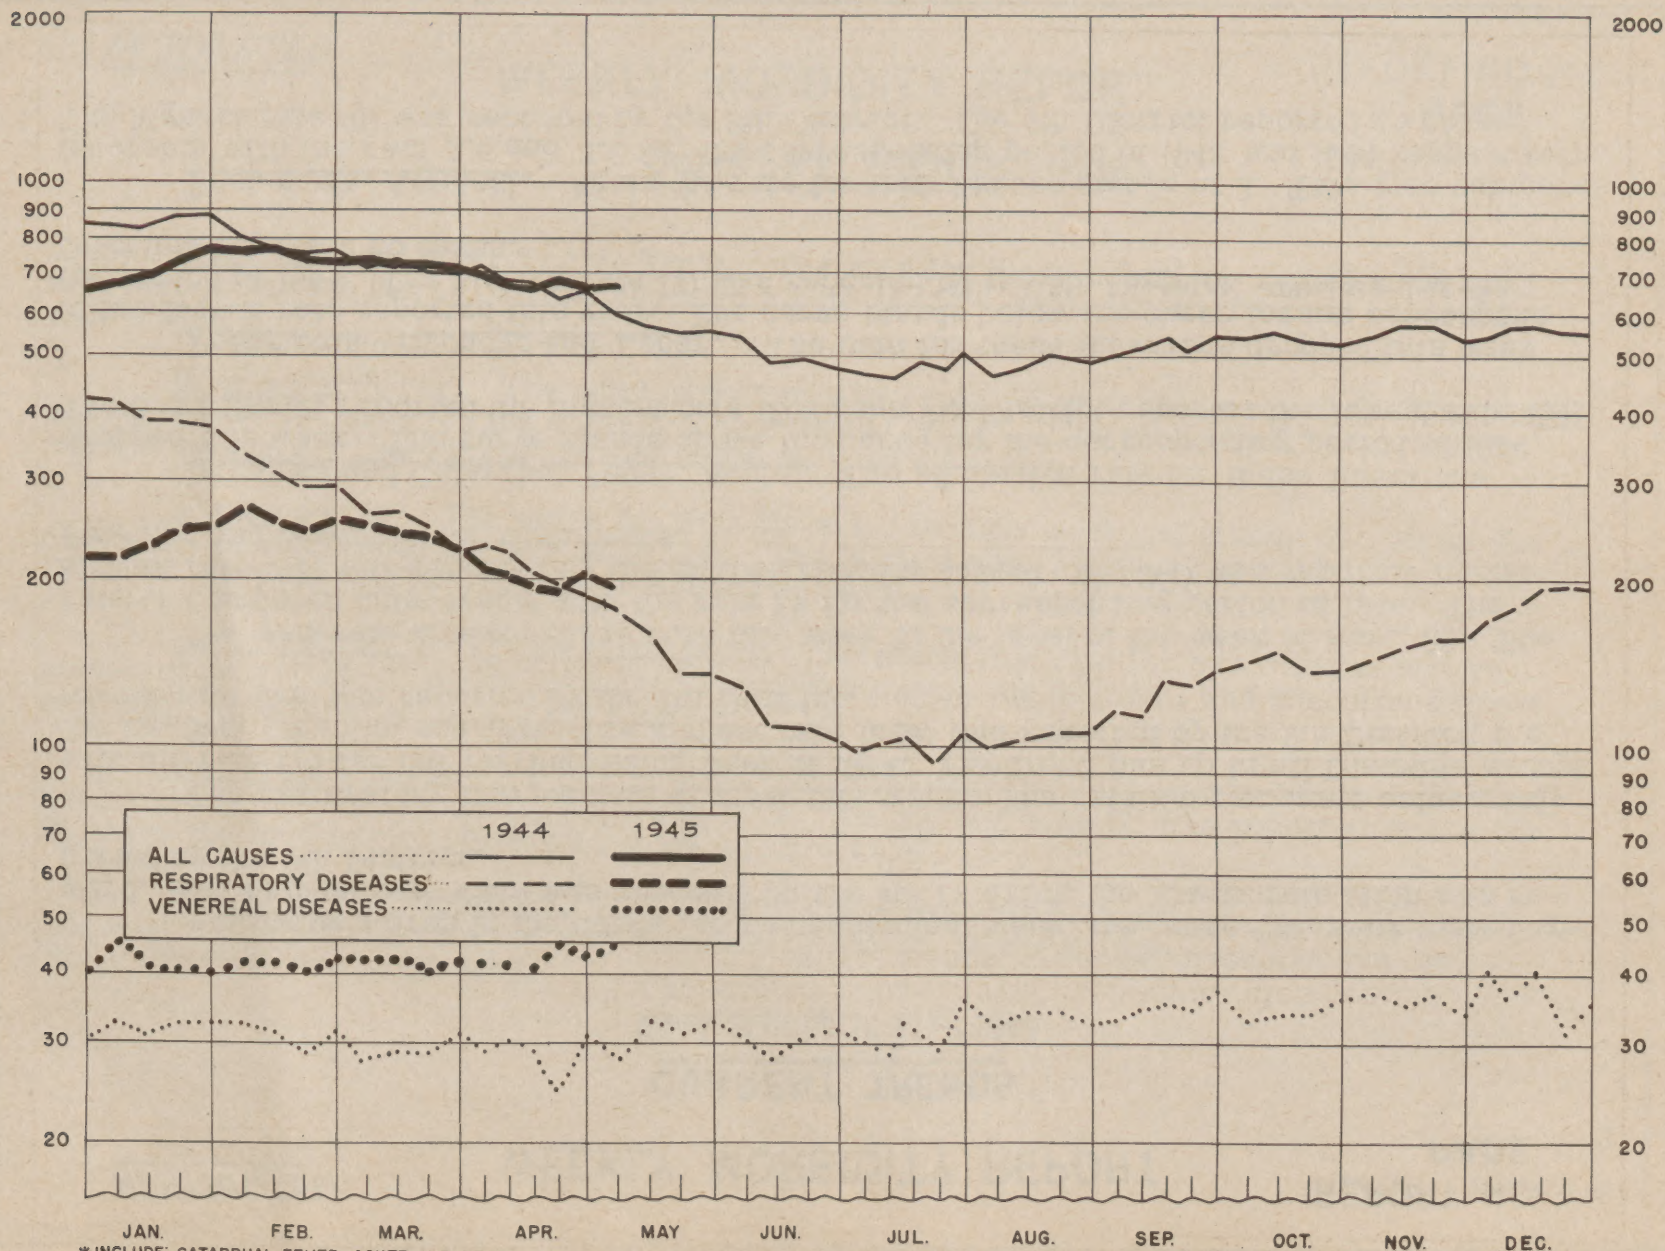

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

CURRENT TRENDS

Week Ending 12 May 1945

Following a drop in the curve for all causes last week, the curve this week turned upward. The highest rate (895) was reported by the 9th District; the lowest rate (459) was reported by the 7th District.

The respiratory disease rate dropped this week. The rate 196 compares unfavorably with the rate 175 for the corresponding week of 1944. The trend was up in all Districts except the 1st, 3rd, 5th, 11th, and 13th. The highest rate (349) was reported by the 9th District; the lowest rate (84) was reported by the 7th District.

The venereal disease curve rose this week to the level of the week of April 28. The rate 45 compares unfavorably with the rate 28 for the corresponding period of 1944. The highest rate (73) was reported by the 8th District; the lowest rate (34) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The admission rate for these infections dropped this week. The curve stands above the curve for the corresponding period of 1944. The 3rd District reported the highest rate (202); the 7th District reported the lowest rate (54).

Pneumonia--Broncho and Lobar. The rate for these infections dropped this week to the lowest rate reported this year. The curve stands below the curve for the corresponding period of 1944. The highest rate (7) was reported by the 5th District. The 1st and 6th Districts reported no cases.

Pneumonia, Atypical. Again the rate for this disease stands at 2. This rate compares favorably with the rate 2.5 and 3.0 for the corresponding period of 1943 and 1944 respectively. The highest rate (6) was reported by the 8th District. The 4th District reported no cases.

PAGE 4

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections stands at 63 again this week. The 8th Naval District reported a rate of (173), while the 4th District reported a rate of (19).

Rheumatic Fever. The admission rate was reported again this week at 2. The curve stands below the curve for the corresponding period of 1944. The 9th District reported the highest rate of 5. The 4th and 6th Districts reported no cases.

Scarlet Fever. The curve for this disease rose this week and stands well above the curve for the corresponding period of 1944. The highest rate (68) was reported from the 9th District. The 6th and 7th Districts reported no cases.

Cerebrospinal Fever, Meningococcic. The admission rate for this disease was reported again at 0.14. Only three districts reported cases, the 3rd, 5th, and 8th. The highest rate (0.51) was reported by the 5th District.

Malaria. The rate for this disease rose this week to 3. The curve is at the level of the curve for the corresponding period of 1944. The highest rate (7) was reported by the 6th District; the 1st District reported the lowest rate (0.54).

Measles. The admission rate 2 for this disease is the lowest rate to be reported this year. The highest rate (12) was reported by the 9th District. The 3rd, 4th, 6th, and 7th Districts reported no cases.
